

Help in the prevention of accidents!

The StVO/StVZO (German Road Traffic Regulations / Road Traffic Permit Act) applies in our plant

Our plant security staff is responsible for the traffic regulation in the plant. Plant security may conduct checks for the protection of a safe traffic flow in the plant.

Please adhere to the speed limit in the plant

Industrial area - rail vehicles have right of way

Pay attention to hooter alarms or audio signals! Only play your radio on low volume.

Minimum distance to be kept to the factory rails is **1.50 m**, in the curves, **2.20 m**.

Only use the direct way to the loading stations. Observe the Guide!

Any accidents must be reported to the factory security immediately!

Smoking prohibited, also in vehicles!

The vehicle driver may not give any persons a ride to the plant except for their PASSENGERS.

For safety purposes, staying in the cabin or bunk of the vehicle while on the plant premises is prohibited.

No animals may be brought into the plant.

No photographs may be taken in the plant.

No alcohol may be brought into the plant.

If an area is signposted as requiring protective clothing to be worn, then this marked area may only be entered wearing protective clothing.

Radio systems / mobile phones

may not be used or be switched on in the plant.

Access to the tank apex prohibited!

Access to the tank apex via the ladder at the rear of the truck only with the folding railings (on one or both sides) is prohibited. Access is only permitted via a suitable staircase system if a fall protection device with a line and harness is used on the truck.

Behaviour in case of emergency!

In an emergency the affected area or the entire plant will be locked down. Should you be in such an area when the emergency alarm goes off, immediately leave the area according to the announcements on the intercom, transversely to the direction of the wind. Go to the meeting place at the east gate.
